Some DVA tours include airports which cannot be reached using our regular flight schedule database. These airports are highlighted in **RED** in the list of tour legs below and can ONLY be accessed by flying to and from them as part of the tour. Therefore, if you fly to the out of schedule airport on a tour leg, you must continue the tour until reaching an in-schedule airport if you wish for your logbook to remain connected. **DVA Operations will not approve any charter flight requests into or out of an out of schedule airport.**

If you have any questions regarding this tour, do not hesitate to contact Kris_Goodrich@DeltaVA.org (this tour organizer) or the Events Department at events@deltava.org.

Airport Charts

If searching for an airport in the USA, you can use the .charts feature in the ACARS program to load the charts for that specific airport. Example, you can type .charts KATL or .charts ATL and a new window will open with all the available procedures for that airport.

Some airports may not have charts available via the ACARS feature. As a suggestion, you may do a search on any of the popular search engines. For example, you may type: "LPMA charts" and follow the links. Some charts might be hard to find, but if you are using the FMS, you can figure out which type of approaches are available for that particular airport.
